

PRESS RELEASE 3

RAPPORT Moves into the Practical Application Phase with Train-the-Trainers Workshops

As part of the RAPPORT project – *RoadMap for Improving the Quality and Responsiveness of VET, Theory and Practice* – co-funded by the European Union through the Erasmus+ Programme, the project consortium is moving into the next stage of implementation with the launch of the RAPPORT **Train-the-Trainers Workshop Series**, organised within **Work Package 4**.

The **Train-the-Trainers workshops** mark an important transition in the RAPPORT project: from the development of project curricula, learning resources and other tools towards their practical application in Vocational Education and Training (VET).

Over the previous stages of the project, RAPPORT partners have worked together to develop learning resources addressing green, digital and entrepreneurial competences, supported by assessment tools, microcredentials and approaches for recognising and validating learning. The next step is to bring these results into practice by supporting VET trainers in understanding, using and integrating the newly developed resources into their own teaching and training environments.

The workshops will focus on strengthening the capacity of VET trainers to integrate green, digital and entrepreneurial competences into their teaching practice through innovative, learner-centred and labour-market-responsive approaches. Participants will explore the RAPPORT curricula, learning resources and assessment tools and receive practical guidance on their implementation in VET.

The online **Train-the-Trainers workshop series** will be delivered via Microsoft Teams according to the following schedule:

- **23 September 2026 | 09:00–15:00 CET** – Green Skills Train-the-Trainers Workshop, led by ASNOR
- **30 September 2026 | 09:00–15:00 CET** – Digital Skills Train-the-Trainers Workshop, led by DIMITRA Education & Consulting
- **7 October 2026 | 09:00–15:00 CET** – Entrepreneurial Skills Train-the-Trainers Workshop, led by MMC Management Center

The **Train-the-Trainers workshops** represent an important step in the broader implementation of the RAPPORT project, paving the way for the pilot delivery of the developed curricula, training materials and assessment tools and the collection of feedback to further validate and improve these resources.
